REASONS FOR ALLOWANCE

1. Applicant's arguments, see pages 7-9 of applicant's response, filed 09 December 2004, with respect to the rejection of claims 1, 5 and 10 under 35 U.S.C. § 103(a) have been fully considered and are persuasive. The rejections of claims 1-7 and 10-11 have been withdrawn.

5 2. The following is an examiner's statement of reasons for allowance: None of the prior art teaches or suggests combining a message image created using a distilled text file with a high resolution scan file of a physical indicia to create a dispersed message, as required by claims 1 and 10. Furthermore, the prior art also fails to teach scanning a document to obtain a digital file of a physical indicia, a digital file of the text and the dispersed message, as stipulated in claims 5 and 10. While Lawandry et al. does use a physical characteristic to create a dispersed message, Lawandry et al. fails to teach the use of a high resolution scan of the physical indicia, so that the dispersed message cannot be created by combining such a high resolution scan of the physical indicia with a message image. Furthermore, while Tel teaches obtaining a high resolution scan of physical indicia, Tel provides no suggestion that such high resolution scan data can be
10 combined with a message image to create a dispersed message. Therefore, the claimed invention is allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for
20 Allowance."

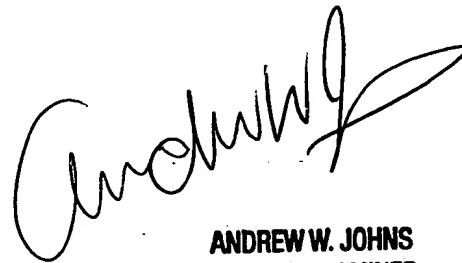

3. Claims 1-7 and 10-11 (now renumbered for issue as 1-7 and 8-9, respectively) are allowed.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Johns whose telephone number is (571) 272-7391.
